About Kansas Gas Service

Kansas Gas Service, a division of ONE Gas Inc., provides safe, clean and reliable natural gas to more than 639,000 residential, commercial and industrial customers across Kansas. Natural gas is delivered to the company’s distribution systems from transmission lines and is then delivered through distribution pipelines. Kansas Gas Service maintains, operates and monitors approximately 21,000 miles of transmission, distribution and service pipelines and 1,008 miles of which are in Oklahoma.

Kansas Gas Service is committed to constructing and maintaining a pipeline delivery system that complies with applicable state and federal guidelines, industry standards and safety regulations. We apply approved pipeline integrity management techniques that monitor system performance and ensure system reliability.

Kansas Gas Service maintains and operates a 24 hour a day, seven days a week gas control center, which is fully staffed to respond to all natural-gas-related emergencies. In the event of a natural gas emergency, trained employees respond immediately and adhere to an emergency response plan devoted to protecting life, public property and company property.

Products Transported and Counties Involved
