About Your Company

Corporate Profile

Kinder Morgan is one of the largest energy infrastructure companies in North America. We own an interest in or operate approximately 84,000 miles of pipelines and 157 terminals and have approximately 11,000 employees. Our pipelines transport natural gas, refined petroleum products, crude oil, carbon dioxide (CO₂) and more. Our terminals store and handle petroleum products, chemicals and other products.

We are a market leader in each of our businesses – **Natural Gas Pipelines, Products Pipelines, CO₂, and Terminals**. We have an unparalleled, large footprint of diversified and strategically located assets that are core to North American energy infrastructure and help deliver needed energy products to high-demand markets. For example, Kinder Morgan is the:

- Largest natural gas network with approximately 70,000 miles of natural gas pipelines. We are connected to every important U.S. natural gas resource play, including the Eagle Ford, Marcellus, Utica, Uinta, Haynesville, Fayetteville and Barnett. We move about 40 percent of the natural gas consumed in America.
- Largest independent transporter of petroleum products, transporting about 2.1 million barrels of product per day. We move gasoline, jet fuel, diesel, crude, natural gas liquids and more.
- Largest transporter of carbon dioxide (CO₂), transporting about 1.3 billion cubic feet per day. Most of the CO₂ is used in enhanced oil recovery projects in the Permian Basin of West Texas.
- Largest independent terminal operator. Our liquids terminals store refined petroleum products, chemicals, ethanol and more, and have a capacity of 147 million barrels. Our dry bulk terminals store and handle such materials as coal, petroleum coke and steel, and we handle over 53 million tons per year. We also have a strong Jones Act shipping position with sixteen vessels in service.

Our customers include major oil companies, energy producers and shippers, local distribution companies and businesses across many industries. In most of our businesses, we operate like a giant toll road and receive a fee for our services, generally avoiding commodity price risk. In our CO₂ business, where exposure to commodity prices does exist, we employ a hedging strategy to partially mitigate that risk.

The revolutionary shale plays across the United States are creating a tremendous need for more energy infrastructure, which bodes well for us. We invest billions of dollars each year to grow the company by building new and expanding existing assets to help ensure that a variety of energy products get delivered into the marketplace.

Kinder Morgan strives for financial and operational excellence, and we are committed to being a good corporate citizen and conducting ourselves in an ethical and responsible manner. In addition to delivering value to our shareholders and meeting our customers' needs, we spend hundreds of millions of dollars each year on integrity management and maintenance programs to operate our assets safely and to protect the public, our employees, contractors and the environment.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards
Natural Gas *Colorless *Odorless	<p>Leak: Do not extinguish unless leak can be stopped safely. Eliminate all ignition sources.</p> <p>Vapor: Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources – NO smoking.</p>	<p>Health: Wear protective gloves/protective clothing/eye protection/face protection</p> <p>Fire: Extremely Flammable Gas / Contains gas under pressure; may explode if heated.</p>
