

**Join the 2023 Oklahoma Pipeline Awareness Liaison (OPAL) program today**

OPAL is a liaison program that doesn't just "check the box." It's a progressive program driven by pipeline operators with a mission to liaise with emergency responders and public officials by utilizing a blended approach and the latest technologies. The program includes innovative outreach efforts, live burn training for firefighters specific to pipeline equipment, and a law enforcement training program debuting in 2023.

The program is CFR 192.615, 195.402 and 195.403 compliant with supplemental outreach that exceeds federal and state requirements. The presentations, classes, and trainings were developed by Oklahoma Fire Service Training (OSUFST) and the Council on Law Enforcement Education and Training (CLEET), so they are all certified for continuing education.

The program outline and schedule can be found on our website, as well as a list of program benefits. If you have questions or need more information, don't hesitate to contact me or any of our members.

Renee Collier  
OPAL Chair
